Warning – Needle-stick Injury

An SRAL employee suffered a needle-stick injury this morning whilst attempting to open the welfare unit behind the IMO car-wash, under the A725 in Whifflet – the hypodermic needle had been ‘hidden’ there by the user and could not be seen by the injured person!

These welfare facilities are therefore **NOT TO BE USED** until further notice and personal are kindly asked to be extra vigilant around all welfare units and access points.
